REGINAL CAMPBELL, M.S., PMP

Enterprise Delivery Lead | Program & Portfolio Management | Lifecycle Governance & Delivery
reginal.campbell@gmail.com • https://www.linkedin.com/in/reginal-campbell-pmp-1551845/

EXECUTIVE SUMMARY

Enterprise Delivery and Technology Program Leader with 15+ years of experience leading complex, multi-year initiatives across regulated, high-availability environments. Proven record directing cross-functional programs spanning product, engineering, data, cloud, security, compliance, operations, and vendor teams, with accountability for integrated planning, governance, budget oversight, risk and dependency management, release readiness, and executive reporting. Experienced establishing delivery cadences, RAID frameworks, critical-path schedules, stakeholder forums, and decision structures that improve transparency, accountability, and execution predictability. Trusted senior escalation point and people leader known for translating strategic priorities into executable roadmaps, resolving cross-team blockers, and driving large-scale programs through implementation and operational readiness.

CORE COMPETENCIES

Program & Portfolio Leadership: Enterprise Technology Transformation | Full-Lifecycle Program Delivery | Integrated Project Planning & Management | Portfolio, Budget & Resource Management

Governance & Delivery Management: Delivery Governance | RACI Development | Steering Committees | RAID Management | Risk & Dependency Management | Vendor & Third-Party Delivery Management

Implementation & Operational Readiness: Testing | User Acceptance Testing | Release Readiness | Cutover Planning | Operational Handoff

Stakeholder & Executive Communication: Collaborative Program Leadership | Partnership-Driven Stakeholder Management | Executive Communication | Decision Enablement

TECHNICAL ECOSYSTEM

Program Tools: OnePlan · Microsoft Project · Jira · Confluence · Visio · Excel · PowerPoint

AI & Automation: AI-Enabled Analytics · Workflow Automation · MLOps · Decision-Support Capabilities

Delivery Methods: Waterfall · Agile · RAID Governance · RACI · OKRs · SLA Management · UAT

Transformation: Change Management · Stakeholder Alignment · Vendor Governance · Cutover Planning

Cloud & Data: AWS · AWS GovCloud · FedRAMP · DataOps · FHIR · HL7 · Power BI · Tableau

SELECTED ACHIEVEMENTS

- **Transformation:** Led governance for a national healthcare data exchange platform processing 2B+ monthly transactions, partnering across product, engineering, cloud, security, compliance, and operations to strengthen release readiness, SLA accountability, and executive visibility.
- **Financial Acumen:** Owned full-lifecycle delivery governance for a $40M multi-year VA platform modernization, managing integrated milestones, vendor coordination, risk controls, resource planning, and executive reporting to achieve 95% program success.
- **Governance:** Established RAID, executive dashboards, delivery cadences, and cross-functional integration standards across concurrent platform initiatives, improving transparency, accountability, and delivery.

PROFESSIONAL EXPERIENCE

Cognosante/Accenture Federal Services | Chicago, IL *2022 – 2026*

Note: Cognosante was acquired by Accenture Federal Services; role continuity maintained through acquisition.

Technical Program Manager — National Healthcare Data Platforms / PMO Delivery Lead | 2024 - 2026

- Served as client-facing delivery lead for enterprise platform engagements, building trusted partnerships across federal stakeholders, product, engineering, cloud, security, compliance, and operations teams to govern delivery of a national healthcare data exchange platform processing 2B+ monthly transactions.
- Demonstrated strong project financial acumen by tracking capital expenditures, analyzing budget variances, and aligning vendor Statement of Work (SOW) delivery milestones with overarching program fiscal allocations.
- Led collaborative execution of multi-year platform roadmaps across a 15+-member cross-functional team, managing resource allocations, capacity constraints, integration testing, and UAT cycles to validate release readiness.
- Defined AI-enabled analytics and data pipeline delivery strategy, coordinating cross-functional teams to operationalize decision-support capabilities and scalable DataOps workflows on AWS.
- Established executive dashboards, steering committee materials, OKR tracking, and delivery reporting cadences that improved transparency, surfaced risks and dependencies, and enabled senior leaders to make faster decisions across competing priorities.
- Managed third-party vendor and partner delivery accountability, ensuring scope alignment, milestone adherence, and performance standards across platform initiatives.

Enterprise Program Manager — PMO: Data Integration & Analytics Platform | 2022 - 2024

- Led portfolio delivery for multiple cloud-based data integration, governance, and analytics platforms, partnering with business, technical, and vendor teams to align roadmaps, resolve dependencies, and improve execution predictability across concurrent initiatives.
- Defined and executed data governance and quality frameworks across enterprise platforms, standardizing data definitions and improving reporting trust for high-stakes healthcare analytics.
- Directed cross-functional technical programs with 20+ team members across integration pipelines, FHIR/HL7 data flows, automation workflows, and analytics enablement for large-scale healthcare ecosystems.
- Introduced delivery cadence and operational discipline, RAID logs, status reporting, and cross-functional dependency management that measurably improved execution predictability across the portfolio.
- Facilitated partnership between architecture, engineering, operations, and business leadership to standardize integration patterns, reduce workflow friction, and improve long-term platform maintainability.
- Built a collaborative operating cadence across product, data, and third-party vendor teams, strengthening milestone visibility, scope alignment, SLA accountability, and shared ownership of transformation outcomes.

Department of Veterans Affairs | Hines, IL *2018 – 2022*

Batch Automation Leader / Technical Program Lead

- Designed and delivered automated data workflows processing 1M+ veteran healthcare records monthly, cutting operational costs 20% while improving data accuracy, availability, and system reliability.
- Led large-scale automation and integration programs connecting legacy and modern systems across millions of healthcare records, defining system requirements, integration rules, and execution frameworks.
- Directed end-to-end scope, sequencing, risk management, and delivery execution for a major platform supporting 1M+ veteran records.

Systems Implementation Leader — Business Process Development *2015 – 2018*

- Led delivery of a $40M, multi-year enterprise platform initiative, coordinating 25+ technical team members, vendors, and executive stakeholders to achieve a 95% program success rate.
- Established success metrics, delivery milestones, and governance structures that improved data accessibility and operational transparency across enterprise healthcare systems.

Management Analyst — Business Applications Laboratory *2014 – 2015*

- Managed maintenance and administration of a legacy data system ingesting 3M+ Veteran records monthly, establishing data quality standards and operational controls to reduce production risk and support reliable reporting.

EDUCATION & PROFESSIONAL CREDENTIALS

PMI Project Management Professional (PMP) — Project Management Institute (PMI)

M.S., Management Information Systems — University of Illinois, Chicago

B.S., Information Technology — Illinois Institute of Technology
